

USB to Parallel Bi-Directional Cable

The USB to Parallel Bi-Directional Cable allows your PC to print to most parallel printer device connected through the USB port. Just plug the USB connector of the cable into the USB port of your PC and the other end into the Centronics connector of the parallel printer and it's ready to use. Plus, the device's USB interface provides up to 12Mbps data throughput, so printing is much faster compared with standard parallel port (150kbs) connection. The USB-to-Parallel cable also features bi-directional communication, allowing the computer to correctly retrieve the message reported from the printer.

Features

- Connects to parallel printer through a USB port on your PC
- Plug & Play; connection in seconds
- Draws its power from the USB interface, no power adapter required
- USB specification revision 1.1 compliant
- USB Printer Class Specification 1.0 compliant
- IEEE-1284 1994 (Bi-directional parallel interface) specification compliant

System Requirements

- Intel-compatible 486DX-66 MHz CPU or higher
- One Standard USB Port
- Windows® XP ,Windows® Vista, Windows® 7, Windows® 8 and Windows® 8.1

Package Contents

- USB to Parallel Bi-Directional Cable
- User's Manual

AP1305

Specifications

Items	Descriptions
PC Interface	USB 1.1 compliant A type male connector
Parallel Connector	IEEE 1284 bi-directional DB36 female connector
Specification Support	<ul style="list-style-type: none">● USB Printer Class Specification 1.0 compliant● IEEE-1284 1994 (bi-directional parallel interface) specification compliant
Buffer Size	Unified 512-byte buffer Dynamically allocated for upstream and downstream data flow
Total Length	2M
Input Pins Voltage Level	5V tolerant
Regulations	CE, FCC

Application

Printer

Computer

Compatible with USB-enabled Desktop PC or Notebook
