

# BYOD USB-C Extender

Simplify BYOD meeting spaces with a single-cable solution. The HUV6300 extends video, USB camera, audio, and touch signals over a CAT cable, replacing bulky USB-C runs with a clean, reliable, and easy-to-install setup—ideal for modern conference rooms and interactive displays.

HUV6300

All-in-one extension over a single CAT cable for video, USB cam, audio, and touch.

Supports up to 4K30 display for clear and stable presentation.

Built-in USB-A on transmitter for wireless presenter or HID devices.

USB-C powered design with PD charging support for BYOD laptops.
