Stunning Videoconferencing Solution, for Multiple Participants

## HUV6600 Series

USB 5G Hub Switch Extender Kits

The HUV6600, adopting HDBaseT USB3.0 technology, is a complete conferencing solution, ensuring fast and high-quality transmission of USB-native content with a single CATx cable up to 100 meters. The HUV6600 features two devices: the HUV6620 at the host side and HUV6610 at the device side. The HUV6620 allows for dual laptops connectivity at its UFP USB-C ports, providing a fast switch between two laptops and enhancing presentation convenience. In addition, the HUV6610's four built-in USB-A 5G ports enable the connection of more devices, including USB cameras, USB video adapters, and dock, for applications such as video conferencing or multiple display content extension. With the outstanding advantages of HDBaseT, the HUV6600 is a perfect conferencing solution that combines cost-effectiveness and performance for versatile applications.
