Care They'll Actually Accept

Unobtrusive care that lets families see everyday changes — and step in when it matters.

Non-Wearable Edge AI Sensing & Information Management for Everyday Safety

- No Video Output
- Nothing to Wear
- 24/7 Sensing
- Wi-Fi Connected

Care That Doesn't Wait for an Accident

CareCore ADLs web-based platform works with three sensor types — human presence, fall &posture, and stove dry-boil alert — turning events and activity changes in the home into clear,actionable information. Ideal for seniors living alone, senior housing, and care service providers.

Sensors report events & status — CareCore ADLs records, visualizes, applies rules, and sends notifications.

Ease Long-Distance Worry

Even when family can't be there, they stay informed of unusual events and daily changes.

Fewer False Alarms

Human recognition and Edge AI reduce false alarmsfrom pets and other non-human movement.

Instant Alerts

Falls and other qualifying events trigger instant email alerts to your account.

Respect Their Dignity

No wearables, no charging — so care never feels like an admission of getting old.

See Trends, Not Just Events

Daily-to-yearly activity data reveals changes in routines and activity levels.

Privacy-First Protection

On-device CIS and Edge AI processing. No images are output — support, not surveillance.

CARECORE ADLS × EDGE AI SENSORS

Fits Any Setting.
Builds Trackable Safety Data.

Flexible setups for any space, scaled to your needs.

- 24-hour room occupancy
- Daily, weekly & monthly activity logs
- Activity & fall alerts
- RESTful API & third-party integration

Three Sensors for Three Critical Concerns

Human Presence Sensor

Builds an occupancy record for each room, showing whether someone is there day to day.

Easy Installation
Wall-mount at 1.5–2 m (4.9–6.6 ft). USB Type-C power and Wi-Fi.

High-Precision Sensing
Range up to 6 m (19.7 ft). Detects people even when still, with a pet-immune algorithm to revent false alarms.

SD42000N1

Fall & Posture Sensor

From presence, posture, and activity data to fall detection — helping you track changes in daily activity.

Alerts in Seconds
When a fall posture is detected, the system instantly sends an event alert.

Trend Alerts
Weekly, monthly & yearly analysis of standing, sitting and walking reveals changes early.

⚠ Note: Avoid pointing the sensor at TV screens, dolls, mannequins, or other human-shaped objects.

SD42300N1

Stove Dry-Boil Alert

Uses a thermal array and Edge AI to detect abnormal stove temperatures. With presence data, it warns of and reports unattended cooking.

Stove Safety
Measures 0–320°C (32–608°F), ±3% accuracy at 15–45°C (59–113°F) ambient.

Loud, Clear Alarm
At least 85 dB within 3 m (10 ft) — a loud alarm that's hard to miss.
