

USB 3.0 Smart Docking Station

The USB 3.0 smart docking station is a unique design for a computer that has extra connectivity demands. Through the docking station, you can extend the connection of a computer to more USB peripherals, Ethernet network, speaker and microphone using only one USB port on your computer.

This docking station is built-in USB 3.0 ports which mean you can enjoy the super speed data transmission between USB peripherals. Besides, this product is fully compliant with the USB 1.1/2.0 specification. Your previous USB 1.1/2.0 devices can continue to function as usually. Also, BC1.2 charging port design (Front Port) is more flexible and user friendly design for User.

With the DVI-I video output feature, you can connect a monitor LCD or projector through DVI or DVI to VGA Adapter. The connected monitor can be configured to either mirror your primary screen, or extend the Windows desktop allowing visibility of more applications at the same time. No more stacking windows within the confines of a single display. As to the housing, with slim type stylish-like design, the upright design of the body helps to spare your desktop space. Most peripherals are connected behind while one USB port and audio outputs are implemented on the front panel for easier accessibility. Enhanced expansion capability plus the stylish appearance, surely this docking station with video is the most versatile accessory that also complements your home or office space.
