

USB 3.0 to 4K DP Adapter

The USB 3.0 to 4K DisplayPort Adapter is a device which enables connection to 4K Ultra HD display device to a computer using USB 3.0 port. It will make your legacy PC with old graphics card to support 4K resolution easily. Besides, with this convenient design, it can connect up to 6 display devices to a computer without installing extra video cards. Once the driver has been installed, the USB-attached monitor will be enabled immediately without any rebooting process of operating system after plugging the USB adapter. System performance is an important issue when using multiple monitors. Another benefit of this adapter is that it occupies little computer resource; ensuring users get quality display without comprising computer performance.

System Requirements

- Operating Systems:
- Windows® 7/ Windows® 8/ Windows® 8.1

Package Contents

- USB 3.0 to 4K DP Adapter x1
- CD (Driver and User's Manual) x1
- Quick Installation Guide x1

AN38B0

Features

- Supports High Resolution up to 3840x2160 Pixels
- Supports up to 6 USB display simultaneously
- Backwards compatible with HD/Legacy monitors
- Extend and Mirror mode support
- Access to 4K Ultra HD displays for legacy PCs
- USB bus-powered
