

DUK6850

USB-C Share4 Dock

The DUK6850 serves as a convenient conferencing dock, enabling two laptops to share displays, power, data, and devices, significantly enhances conferencing efficiency and quality. When connected, it's exclusive "Select Mode" and "Share Mode" allow one of both laptops to extend content to two 4K60Hz displays, or project each content to individual display at the same time. Simultaneously, the DUK6850 delivers a total PD130W to both laptops, ensuring efficient charging. It's share feature also facilitates seamless file transfer and shared keyboard and mouse functionality between the laptops, providing enhanced flexibility. Other USB devices, such as flash drives, cameras, or speakerphones, can be shared through the dock. With four powerful share modes, the DUK6850 comprehensively meets conferencing and collaborative needs, enhancing overall productivity and performance.

Feature

- Share the displays: Allows one of connecting laptops to extend content to two 4K60Hz displays, or both laptops project contents to two individual displays
- Share the power: Two laptops share a total power delivery of 130W, sourced from two USB-C UFPs
- Share the data: Supports file transfer between both laptops
- Share the devices: Both laptops can share USB devices through its five USB-A ports and one USB-C port
- Quick and convenient one-click selection and content sharing between two host laptops through built-in select and share buttons or remote cable
- Perfect compatibility with Windows and macOS
