

4K Video Capture Adapter

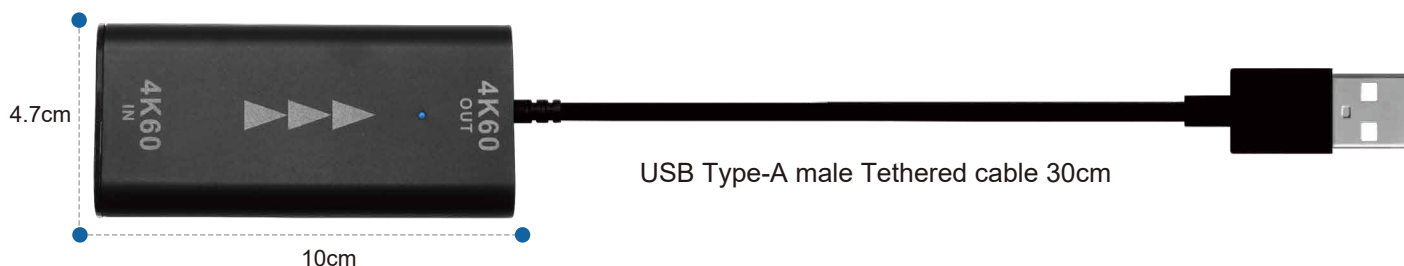

VUZ7140

One way to simplify and enhance presentations is by showing additional materials from another computer on the main computer screen running the presentation. However, in practice, it is often necessary to disconnect the display cable from the main computer and connect it to the other computer in order to display the supplementary materials. VUZ7140 is a small adapter that can capture video and easily display a second notebook's screen on the same monitor during meetings, without constantly switching cables between different notebooks at presentation.

Feature

- HDMI2.0 input with the resolution up to 3840x2160p 60Hz from a notebook PC, tablet, camera, and other devices
- USB-A captured video input with the resolution up to 3840x2160p 60Hz input to the Notebook PC
- Supports UVC (USB Video Class) & UAC (USB Audio Class)
- Bus-powered by USB-A port from the connected notebook PC
- Compatible to Windows and MacOS
- Supports video applications of VLC, OBS, Potplayer, MS Teams, and Zoom

Specification
